

## Medicare Accelerated and Advance Payments State-by-State

The CMS Accelerated and Advance Payment Program is designed to increase cash flow to Medicare providers and suppliers impacted by the 2019 Novel Coronavirus (COVID-19) pandemic. These payments are funded from the Hospital Insurance (Part A) and Supplementary Medical Insurance (Part B) trust funds, which are the same fund used to pay out Medicare claims each day. The advance and accelerated payments are a loan that providers must pay back. It is important to note, this funding is separate from the \$100 billion provided in the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The CARES Act appropriation is a payment that does not need to be repaid.

Below is a table that shows a State by State breakout of these payments as of Friday, April 4, 2020. We plan to update this information once a week on our website.

Details on the eligibility, and the request process can be found at the following link:

- 1) This data includes expenditures under the provider's registered State for payment and not on the location where the provider provided the service.
- 2) Many providers offer both Part A and Part B services. The Part A data includes total expenditures (Part A and B) for any provider that offers Part A services.
- 3) The Part B data includes providers who are Part B providers only.
